

IBM DATA ANALYST CAPSTONE PROJECT

IT skill trends in 2019

Péter TÓTH

12th June 2023

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- IT skills and jobs market trends were analysed
- Collected data from various sources were collected, wrangled and cleaned
- Findings were based on Visualized data
- Main findings:
 - Promising technologies increasing in demand are MERN Stack, Python, Typescript, Cloud, Containers and NoSQL
 - Existing technologies still remain important are SQL, web programming, mobile

INTRODUCTION

- To keep pace with changing technologies and remain competitive, we have to identify future skill requirement
- We seek answers for
 - What are the top programming languages in demand?
 - What are the top database skills in demand?
 - What are the popular technologies?
- The results can be used by IT consultants, software companies and IT professionals to decide, which technologies are worth to seek

METHODOLOGY

- Data Collection
 - GitHub Jobs API
 - WebScraping from IBM homepage
 - StackOverflow data from csv (IBM subset)
- Data Wrangling
- Exploratory Data Analysis
- Data Visualization
 - Graphs, Charts
 - Dashboards
- Presentation of findings

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Worked With

Next Year

Top 10 Desired Languages Next Year

PROGRAMMING LANGUAGE TRENDS – FINDINGS & IMPLICATIONS

Findings

- JavaScript & HTML/CSS has stable position at place 1 & 2
- Python gained popularity, and risen to the 3rd place
- TypeScript getting more popular
- The traditional C++ and PHP disappeared from the TOP 10, giving space to Go & Kotlin

Implications

- Web programming will remain dominant
- Typescript will gain more popularity in web development
- Python will gain more popularity
- Newer technologies, like Go and Kotlin will rise

DATABASE TRENDS

Current Year

Top 10 Databases Worked With

Next Year

Top 10 Desired Databases Next Year

DATABASE TRENDS – FINDINGS & IMPLICATIONS

Findings

- PostgreSQL came to 1st place
- MySQL demand will be lower
- MongoDB came to 2nd place
- Redis, Elasticsearch and Firebase gaining momentum

Implications

- Although still very popular, traditional RDMS is declining
- PostgreSQL may be more popular than MySQL
- NoSQL solutions, like MongoDB will be more popular
- Speed for mobile backends getting more important (Redis, MongoDB, etc.)

WEB FRAMEWORK TRENDS

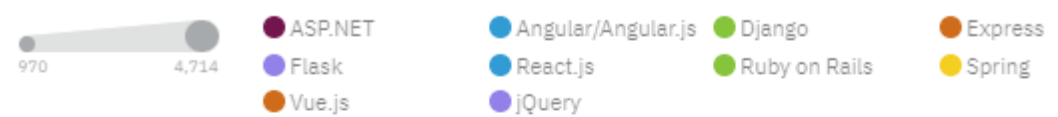

Current Year

Top 10 Web Frameworks Worked With

Next Year

Top 10 Web Frameworks Desired Next Year

PLATFORM TRENDS

Current Year

Platforms Worked With

Next Year

Platforms Desired Next Year

PLATFORM TRENDS – FINDINGS & IMPLICATIONS

Findings

- Demand for Linux is No. 1 among programmers
- Cloud-based platforms like AWS, Azure and Google Cloud are highly sought after
- Container technologies have high demand, Kubernetes is rising
- Mobile devices have high share

Implications

- Cloud platforms and container technologies are getting more important
- Mobile devices continue to have high importance

DASHBOARD

Web link for the dashboard:

<https://eu-de.dataplatform.cloud.ibm.com/dashboards/0fce6f02-3d33-40da-848e-8453bdde57a8/view/4038e0183da911927ffce6e4079f780e783f275bb1bbd103d1817b490a697797a83b46c2c82e4b5b8f115035f3eb440dcc>

CURRENT TECHNOLOGY USEAGE

Top 10 Languages Worked With

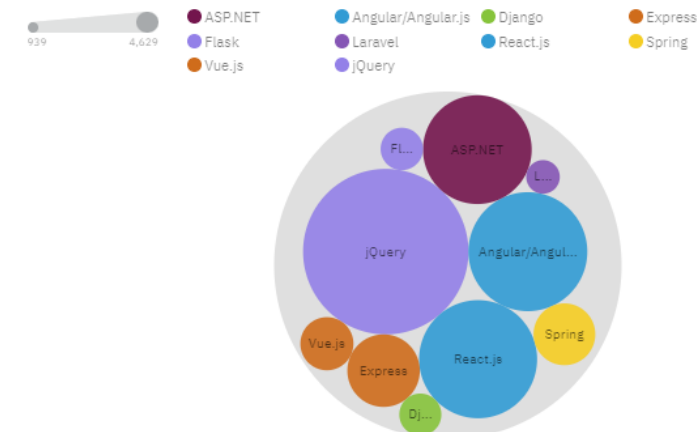

Top 10 Databases Worked With

Platforms Worked With

Top 10 Web Framework Worked With

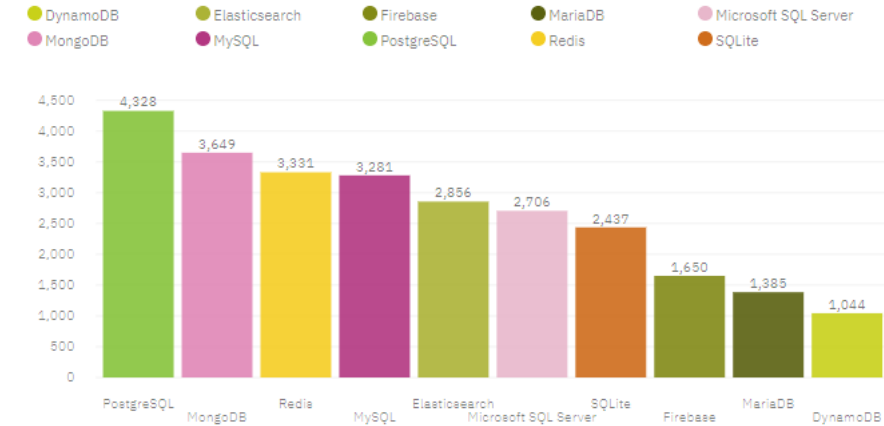

DESIRED TECHNOLOGIES

Top 10 Desired Languages Next Year

Top 10 Desired Databases Next Year

Platforms Desired Next Year

Top 10 Web Frameworks Desired Next Year

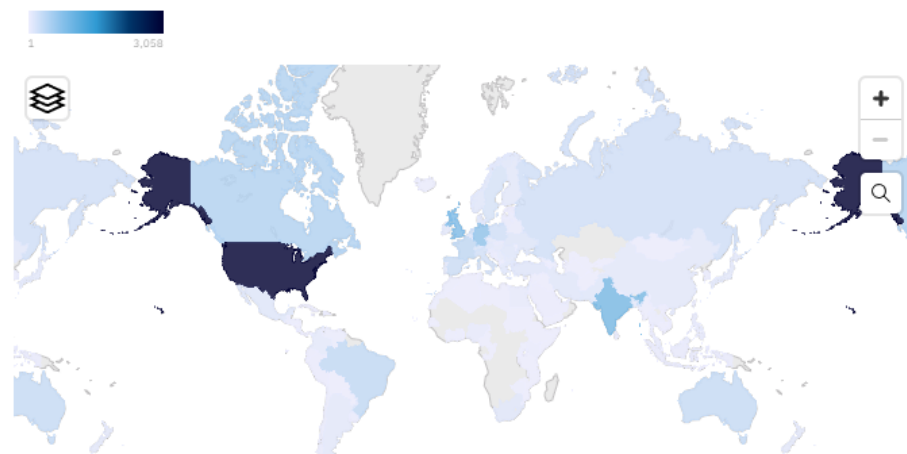

DEMOGRAPHICS

Respondents by Gender

● Woman ● Man

Respondents By Country

Respondent Count by Age

Respondents By Gender & Education Level

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Web programming dominates the used languages
- Alternatives to traditional RDMS are increasing
- Frontend JS frameworks like React and Vue getting more important
- Cloud and container technologies are on the rise

Implications

- Web programming is still a decent career choice
- Demand for NoSQL databases, and Cloud-based databases are rising
- More React and Vue developers are needed
- More Cloud and container-technology experts are needed

CONCLUSION

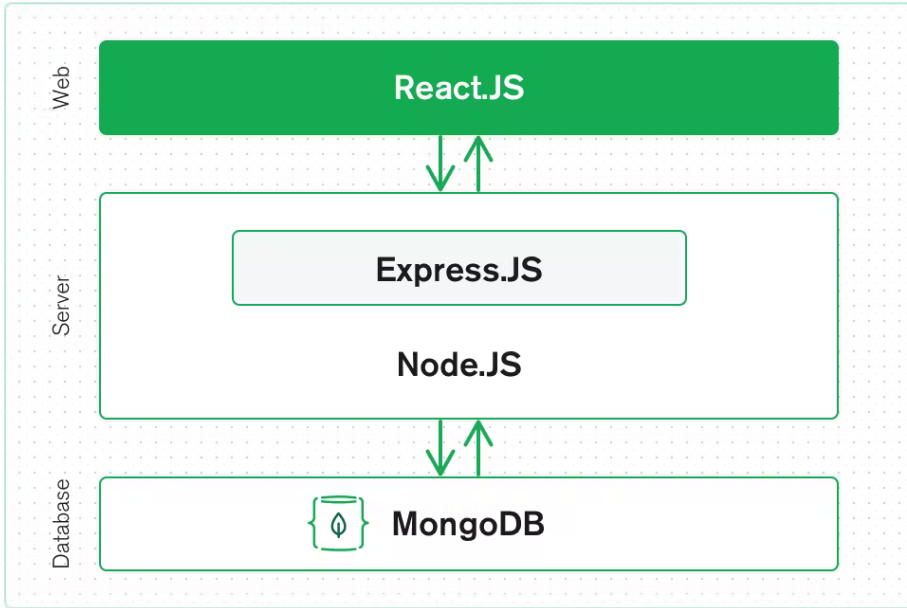

- It is good idea to invest in learning the MERN Stack (MongoDB, Express, React, Node)
- It is advisable to learn Python and Typescript
- Both SQL and NoSQL are worth to learn
- Cloud, container, web and mobile programming are also very good choices

APPENDIX

- MERN Stack
- Job Postings by Location
- Average Salaries by Programming Language

MERN Stack

Source of image: <https://www.mongodb.com/mern-stack>

- MERN Stack is a web-programming architecture:
 - MongoDB as database tier
 - Express.js and Node.js as server tier
 - React.js as frontend tier
- According to findings
 - Demand for MongoDB and React is highly increasing
 - Demand for Web development, Javascript, Node and Express is high/stable

JOB POSTINGS

Number of IT Jobs by Location

POPULAR LANGUAGES

Average Annual Salary by Language
